

Advanced Backup Solutions - Company Overview

TRUE BUSINESS CONTINUITY

ABS Overview

With installations across the United States, Advanced Backup Solutions (ABS) protects business, education, healthcare, hospitality, non-profit and government networks from data loss and provides a complete platform for business continuity. ABS leverages leading technologies for all-in-one solutions that are easy to deploy and manage.

Distributed by a well established network of certified partners, ABS provides complete protection for headquarters, branch office, and remote locations. Founded in 2005, ABS is a leading vendor in the fast-growing market of business continuity and disaster recovery.

ABS implements a best of breed model with its solutions and infrastructure.
